

# Sivagurunathan P

Full-Stack .NET Developer

📍 Tiruchirappalli, Tamil Nadu 📞 +91-8825799943 ✉ p.sivagurunathan28@gmail.com  
🌐 linkedin.com/in/sivagurunathan-p 🏠 github.com/Sivaguru28 🌐 Portfolio

## Professional Summary

- Results-driven **Full-Stack Developer (.NET & Angular)** bringing **nearly 2 years** of professional experience in designing and developing enterprise web applications. Strong focus on intuitive **UI/UX design** and responsive frontend development with **Angular**, seamlessly integrated with robust backend architectures using **C#, .NET Core, ASP.NET Core, and SQL Server**. Experienced in RESTful API development, frontend and backend integration, stored procedures, workflow automation, and production support activities. Familiar with Agile/Scrum methodologies, SDLC processes, deployment workflows, bug fixing, and enhancement delivery in enterprise environments.

## Technical Skills

|                        |                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Languages              | C#, SQL (T-SQL), JavaScript, TypeScript                                                                                           |
| Frameworks & Libraries | .NET Core (6/8), ASP.NET Core MVC, ASP.NET Web API, Angular (17/19/21), Entity Framework Core, Dapper, SignalR, jQuery, Bootstrap |
| Web Technologies       | HTML5, CSS3, Responsive Design, Swagger/OpenAPI                                                                                   |
| Databases              | MS SQL Server (SSMS), LINQ Queries, Stored Procedures                                                                             |
| APIs & Integrations    | RESTful APIs, SendGrid, OpenText Metastorm BPM, Postman, N8N                                                                      |
| Tools & Platforms      | Visual Studio 2022, VS Code, Git, GitHub, Jira, Figma                                                                             |
| Methodologies          | Agile, Scrum, SDLC, Code Reviews, Git Branching Strategies                                                                        |

## Professional Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                  |

| <b>Asset Management System</b>                                                                                                                                                                                                                                                                                                                                                                                          | <i>Angular v21, .NET Core Web API, SQL Server</i> |
| <ul style="list-style-type: none"><li>Designed and developed a full-stack asset tracking platform to manage hardware inventory, employee assignments, and reporting workflows.</li><li>Built reusable Angular components with dynamic dashboards, real-time reporting, and secured REST API integrations.</li><li>Designed optimized SQL Server schemas and queries supporting scalable inventory operations.</li></ul> |                                                   |

## **HRMS – Human Resource Management System**     *Angular 17/19, .NET Core MVC, ASP.NET Web API*

- Contributed to the development of an internal HRMS platform managing employee records and recruitment workflows.
- Built Angular frontend modules integrated with ASP.NET Core REST APIs using Entity Framework Core and Dapper.

## **Amil Freight – US Logistics Platform**     *C#, .NET MVC, SQL Server, SendGrid*

- Developed the Campaign module for sales operations with bulk email functionality and delivery tracking using SendGrid integration.
- Implemented reply tracking and sentiment analysis workflows for automated response classification.

## **VCARE – Clinic Automation System**     *n8n, SQL Server, SendGrid, REST APIs*

- Orchestrated the automated execution of complex SQL Stored Procedures via **n8n**, eliminating manual database interventions and modernizing the clinic's data pipeline.
- Engineered a dynamic template-rotation workflow that automatically shuffles and assigns specific departmental email templates week-over-week, streamlining staff operations.
- Integrated AWS via HTTP nodes to fetch and filter real-time user unsubscribe lists prior to dispatch, ensuring strict data compliance across all automated campaigns.

## **Education**

---

### **SASTRA Deemed University**

Master of Computer Applications (MCA)

*Thanjavur, Tamil Nadu*

*July 2022 – May 2024*

### **National College**

Bachelor of Computer Applications (BCA)

*Tiruchirappalli, Tamil Nadu*

*July 2019 – May 2022*

## **Certifications**

---

- **Angular (Intermediate)** — HackerRank
- **Build AI Agents and Automate Workflows with n8n** — LinkedIn
- **UX Fundamentals** — HCL GUVI

## **Honors & Awards**

---

- **“Shining Star of 2025” Award** – Vagus Technologies
- Runner-Up in Error Debugging Competition — LIVEWIRE Technical Fest, Tiruchirappalli
- Runner-Up in Photography Competition — SASTRA Deemed University, Thanjavur (Nov 2022)
